

Alex Koziel of Paris, TX

says he was amazed with the Dust Commander virtually dust free tile removal system! “*I never imagined tile removal could be so clean.*”

When Alex Koziel decided he wanted to replace the tile in his home, he knew he wanted to find an alternative to the extensive dust that traditional methods leave behind. He found his answer in the *Dust Commander* virtually dust free tile removal system.

Following are some of the things Alex had to say about *Dust Commander*: “First of all, the crew was outstanding—professional and courteous at all times. They answered all my questions and even had the work done in one day, despite the 2 day estimate I was initially given. The equipment is superior; there was virtually NO DUST! Even after the tile was done, the thinset was ground, vacuumed and then they practically polished my concrete foundation. It is perfectly smooth and ready for the installers to lay my new floor. I would say this is the total solution with modern equipment. I love it...I’m completely satisfied. The guys did superior work and I would highly recommend *Dust Commander* to anyone. I will NEVER use any other method. Good job!”
